

MANDARIN PEELERS · ASSEMBLY GUIDE

The mandarin man

Every part sits on a pin or in its own pocket. Order and part numbers are in each step's drawing; part names match Bambu Studio.

In the box

- Printed parts
- Pins (on their own plate)

You will need · not in the box

- Gel superglue (cyanoacrylate) — for the face parts and trims
- Optional: plastic or rubber mallet
- Optional: craft knife

Pins

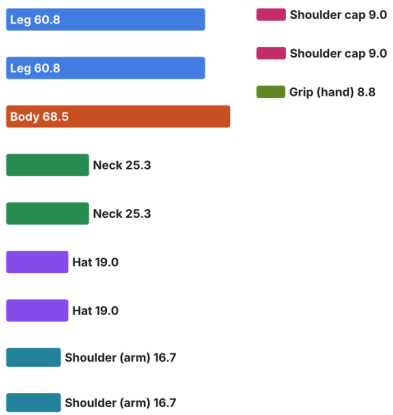

- **Ribbed pins:** a fine rib on the side faces tightens over the last 3 mm and holds the pin; no glue on pins.
- **Orientation:** one corner of the pin is chamfered, and so is the hole. Turn the pin until the corners match; if not, flip it end to end — never force.
- **Order:** seat the pin fully in the lower part first, then push the upper part onto it.
- **Force:** press with your palm; tap lightly with a mallet if needed. No hammer, no vice.
- **Too tight?** Shave the rib once with a craft knife.

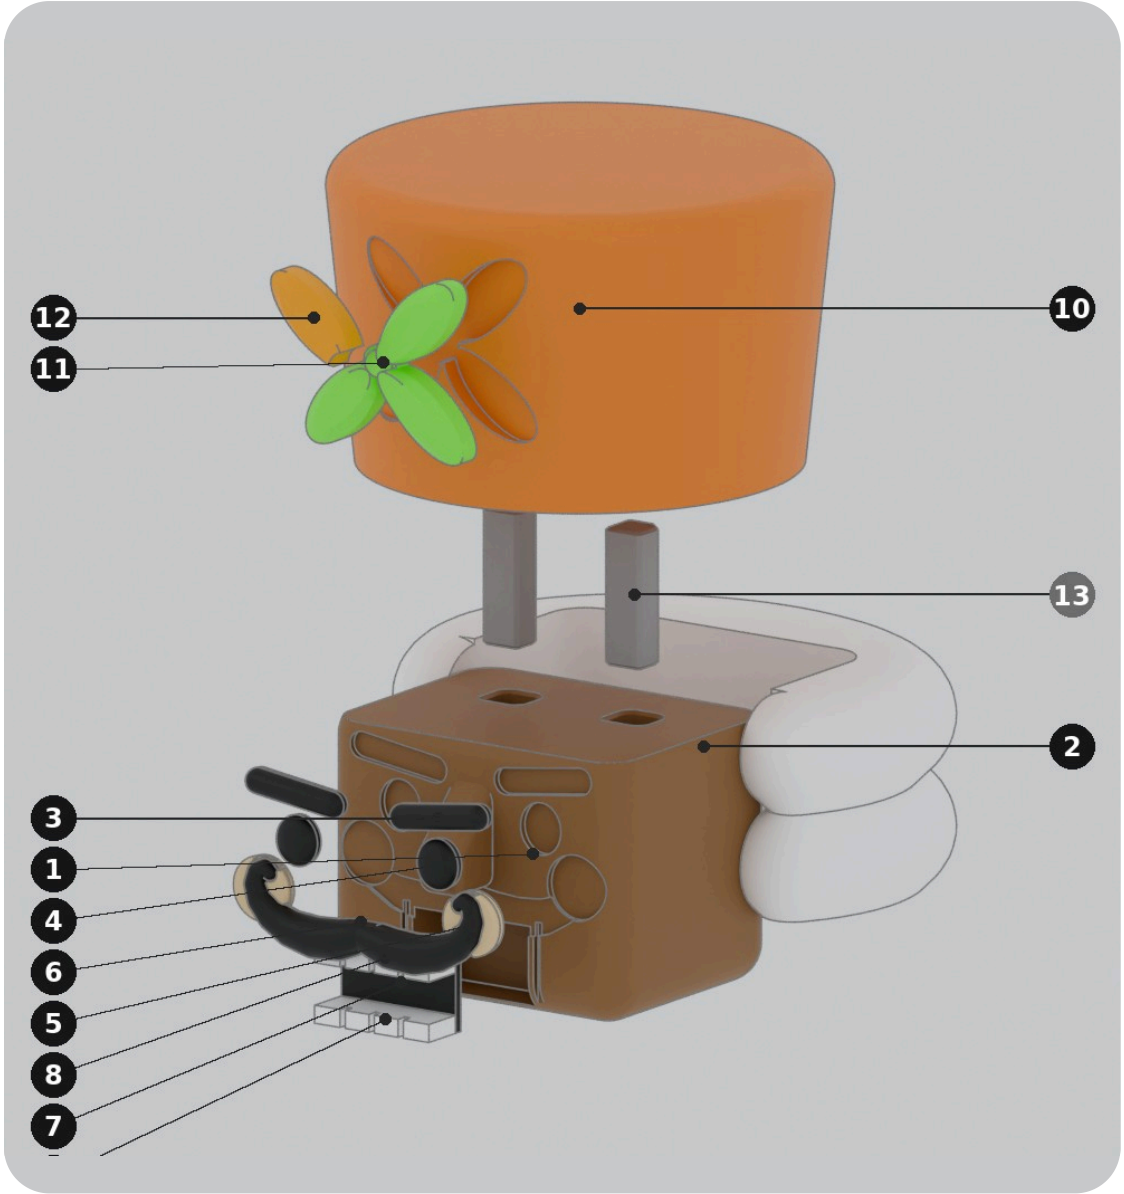

Glued parts

Eyebrows, eyes, cheeks, moustache, mouth, teeth, buttons, leaves, slice lines. Press into its pocket; if it moves, put a single drop of gel glue in the pocket and wipe any excess at once. The hair is not glued: it slides over the head and the hat locks it.

Pin	Size	Qty
Leg	6 × 60.8 mm	2
Body	6 × 68.5 mm	1
Neck	6 × 25.3 mm	2
Hat	6 × 19.0 mm	2
Shoulder (arm)	5 × 16.7 mm	2
Shoulder cap	3 × 9.0 mm	2
